

AREEBA ZAHID

Software Engineer | Frontend Web Developer

areebaz665@gmail.com | +92 316 2176393 | Rawalpindi, Pakistan | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven Software Engineering student with hands-on experience in full-stack and frontend web development. Proven track record delivering responsive, user-friendly websites for clients via freelancing and internship. Proficient in React.js, Node.js, WordPress, and cloud deployment using AWS and Docker. Currently completing a Final Year Project building an AI-powered resume builder with ATS optimization features.

WORK EXPERIENCE

Web Developer Intern — Tecinn360 Pvt Ltd

Jul 2025 – Aug 2025

Rawalpindi, Pakistan

- Built and customized responsive WordPress websites using Elementor, custom themes, HTML, CSS, and JavaScript, improving client site performance.
- Configured and optimized WordPress themes and plugins, enhancing website speed and user experience.
- Translated client requirements into clean, modern, pixel-perfect web pages, consistently meeting project deadlines.

Freelance Full Stack Developer — Fiverr

Oct 2024 – Present

Remote

- Delivered responsive, visually appealing websites for international clients using WordPress, Wix, HTML, CSS, and React.js.
- Designed intuitive UI/UX layouts with clean code and smooth functionality, achieving high client satisfaction ratings.
- Managed client communications, gathered requirements, and delivered polished, high-quality projects on schedule.

Member — Taxilians Robotics and Automation Club, UET Taxila

Sep 2024 – Sep 2025

UET Taxila, Pakistan

- Contributed to robotics and automation projects within the university club, collaborating with cross-functional student teams.
- Applied software development skills to support hardware-software integration in automation projects.

EDUCATION

BSc. Software Engineering

Sep 2022 – Jun 2026

University of Engineering & Technology (UET), Taxila, Pakistan

Relevant Courses: Object-Oriented Programming, Data Structures & Algorithms, Machine Learning, Artificial Intelligence, Database Management Systems, Software Design & Architecture, Computer Networks, Operating Systems, Software Project Management, Digital Image Processing, Mobile Application Development

TECHNICAL SKILLS

Languages: C++, Java, JavaScript

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js

Backend: Node.js

Databases: MySQL, Oracle, MongoDB

CMS & Tools: WordPress, Elementor, Wix, Git, GitHub

AI / ML Libraries: LangChain, Groq LLaMA 3

PROJECTS

AI-Powered Resume Builder (Final Year Project)

Sep 2025 – Jun 2026

- Engineered an AI-powered resume builder that generates professional, ATS-optimized resumes from user input, leveraging NLP for content suggestions.

- Integrated AI features to recommend content improvements, optimize formatting, and tailor resumes for specific job descriptions.
- Built a fully responsive frontend with React.js and an efficient backend for resume generation, storage, and export.

CodeGenius AI — Multi-Agent Software Engineering Assistant

Apr 2026

Live: <http://3.94.251.182/>

- Built an AI-powered multi-agent system for code generation, debugging, explanation, and SRS document generation using Groq LLaMA 3, LangChain, and FastAPI.
- Implemented modular agent workflows with real-time streaming responses and contextual reasoning to handle complex developer queries.
- Deployed on AWS EC2 using Docker and CI/CD pipelines with a React.js frontend and FastAPI backend for scalable production use.

Lumina-Shop — Premium E-Commerce Platform

March 2026

- Built a premium, modern e-commerce platform using React.js, Vite, and Tailwind CSS with a persistent shopping cart and responsive product filtering.
- Integrated smooth Framer Motion animations for enhanced user experience and polished UI interactions.

The AI Personal Life Operating System (Jarvis-like Assistant)

- Designed a modern, event-driven, multi-agent microservices architecture combining a highly responsive real-time React frontend with a Python FastAPI backend orchestrated by LangGraph.
- Implemented an intelligent assistant system inspired by Jarvis, capable of managing personal tasks and life operations through AI-driven multi-agent workflows.
